

{ Aliyev Axmadillo | Frontend developer }

\$ cd ~/about_me:

I am a Frontend Developer with over 1.5 years of experience. My primary focus is on the Vue and React ecosystems, and I have experience in building modern web applications using TypeScript. Additionally, I have backend development experience with Node.js, Express.js, NestJS, Prisma, and PostgreSQL. I have hands-on experience working on team projects, including building startups or complete systems from scratch.

\$ cd ~/hard_skills:

JavaScript/TypeScript - Proficient in working with ES6+ syntax, DOM and BOM APIs, and asynchronous processes. Experienced in using TypeScript features such as interfaces, types, enums, and generics.

Vue (Composition API) - Creating SPA projects in Vue 3, integrating with **Pinia** and **Vue Router**, managing state between components, using techniques such as **dynamic routing** and **lazy loading**.

React - Working with **functional components**, **Hooks**, **Redux Toolkit** or other state management libraries. Techniques such as **Context API**, **memoization**, and **dynamic rendering**.

Nuxt.js - Working with **SSR**, **SSG**, **ISR**, **data fetching**, **SEO optimization**, **API routes**, **directory structure**, and **Nuxt modules**. Integration of **authentication** and **middleware**.

Next.js - **SSR**, **SSG**, **ISR**, **Server Actions** and **Data Fetching**, **App Routing**, structure of **server** and **client components**, **SEO optimization**, **API routes**, and **reactivity**.

Prisma - **ORM**, **Prisma Studio**, **migrations**, **CRUD queries**, and **defining models**. **Relation mapping** and **optimization**.

PostgreSQL - Working with **pgAdmin 4** and **SQL Shell (psql)**.

NodeJS - Creating asynchronous backend servers, writing APIs with **Express.js**, and working with the **file system**.

NestJS - Creating **REST API endpoints**, writing automatic API documentation using **Swagger**, and working with **middleware** and **guards**.

\$ cd ~/experience:

~ Kwork (May 2023 - Present) - Freelancer

Actively participated in creating responsive and intuitive user interfaces on a freelance platform. Delivered modern solutions tailored to client requirements using technologies such as Sass, TailwindCSS, Bootstrap, and JavaScript, with a strong focus on design and functionality. As a result of these projects, the client base increased by 25%, and user satisfaction with interfaces improved by 18%.

~ **OnlineShop (April 2023 - November 2023) - Frontend developer (React, Typescript)**

Contributed to a project focused on building an admin panel and user interface. Developed a responsive and pixel-perfect interface based on a UI/UX designer's mockup. The implemented admin panel accelerated order processing and data management by 30%, leading to increased user traffic.

~ **BuildUp (December 2023 - August 2024) - Frontend developer (React, Typescript)**

Actively participated in the development of a startup project, focusing on project architecture, business logic, and SEO optimization. As a result, the number of website visitors increased by 40%, and the conversion rate rose by 15%. The optimized interface significantly improved the overall user experience (UX).

~ **APIhive (March 2024 - September 2024) - Backend developer (NodeJS, NestJS)**

Participated in a startup project aimed at providing free APIs for beginner developers, including geolocation, weather, and currency exchange services. Implemented a modular service-oriented architecture using Node.js and NestJS, and contributed to writing complete OpenAPI documentation using Swagger.
