// stack

FRONTEND — core

Vue · Nuxt · React · Next.js · Svelte
TypeScript · JavaScript
HTML · CSS · Sass · Tailwind

STATE

Pinia · Zustand · Redux Toolkit

BACKEND

Node.js · NestJS · Express · Bun · Python
PostgreSQL · Prisma · REST API

DEVOPS & TOOLS

Docker · GitHub Actions · CI/CD
nginx · Vite · Git · Prettier · ESLint · Figma

// languages

Uzbek — Native
Russian — Advanced
English — Intermediate
Japanese — Beginner

// education

Fergana State Technical University

B.Sc. Software Engineering
2025 — 2029

ACCELERATORS

StartUp Booster — United Ventures, 2026
StartUp Init — UNDP × Pizza Pitch × IT Park, 2026

Axmadillo Aliyev

Software Engineer

// about

Software engineer who ships products end to end — UI, API and data. Strongest in the frontend (Vue and React with TypeScript: SPA, SSR/SSG, component architecture, state management), and equally comfortable building the backend that powers it (Node.js, NestJS, PostgreSQL) and shipping it with Docker / CI-CD. Currently co-founder and CTO of Planner AI, a live event-services marketplace.

// experience

Planner AI · Co-founder & CTO

Mar 2026 — Present

planner-ai.uz · *event-services marketplace for Uzbekistan*

- ▶ Lead product architecture, frontend development and the technical team for a marketplace that lets users find and book services for events.
- ▶ Built the web client with a component-driven architecture (React + TypeScript, Zustand) — reusable UI, typed API layer, predictable state.
- ▶ Own the backend foundation (NestJS, PostgreSQL, Prisma) and the API contract the frontend consumes — true full-stack delivery.

Kwork · Freelance Developer

May 2023 — September 2025

- ▶ Build responsive, pixel-perfect interfaces from designer mockups for individual clients.
- ▶ Ship client work with Vue, JavaScript, Tailwind CSS and Sass, focused on clean markup and good UX.

// projects

Nuxt Tube — video platform with upload, playback and creator channels. Nuxt · Vue · Pinia

Vue Sneakers — e-commerce store: catalog, filtering, favorites and cart. Vue · Vite · Pinia

Unisport — sports platform: team profiles, events and live match stats. Next.js · React · TypeScript

NovaPark — parking system with booking and real-time occupancy monitoring. React · TypeScript · Express

// achievements

- ▶ **1st place** — Oliygo Kubogi (University Cup), AI / No-Code track, 2026.
- ▶ **Finalist** — National AI Hackathon (Space Tech), IT Park Fergana, May 2026.
- ▶ **Finalist** — Tech4Region (Urban Tech), Andijan Digital City, Nov 2025.
